PROFESSIONAL SUMMARY

Full Stack Software Engineer with 5+ years of experience building enterprise web applications, ERP solutions, and e-commerce integrations using Angular, React, TypeScript, Node.js, NestJS, REST APIs, and SQL databases. Proven track record of improving backend ERP system performance by 20%, enhancing UX across 50+ projects, and implementing integration solutions that increased e-commerce profitability by 15%+. Strong background in frontend architecture, reusable components, backend services, database-driven applications, production support, and Agile collaboration.

TECHNICAL SKILLS

Frontend: Angular, React, TypeScript, JavaScript, HTML5, CSS3, PO-UI, responsive UI development

Backend: Node.js, NestJS, Express.js, REST APIs, Sequelize, Prisma, business logic, system integrations

Databases: PostgreSQL, SQL Server, Docker, MongoDB, SQL queries, database modeling, query optimization

Tools & Practices: GitHub, Postman, Cypress, Agile/Scrum, code refactoring, troubleshooting, production support

PROFESSIONAL EXPERIENCE

Full Stack Developer | New Tech Solutions LTDA

May 2023 – Present

Brazil / Remote

- Develop and maintain scalable full-stack enterprise applications using Angular, React, Node.js, TypeScript, SQL, and REST APIs.
- Build backend services, data models, business rules, and integrations using Sequelize and REST APIs, improving backend ERP system performance by 20%.
- Create reusable Angular components and user-focused interfaces, improving UX consistency and workflow efficiency across 50+ enterprise projects.
- Optimize API performance, database queries, and service architecture for business-critical systems handling large operational workflows.
- Troubleshoot production issues, analyze root causes, and implement stable fixes to improve reliability and reduce recurring incidents.
- Implement business-oriented integration solutions that increased e-commerce integration profitability by 15%+, collaborating with product, business, and technical stakeholders.
- Apply clean code principles, maintainable architecture patterns, and scalable frontend/backend development practices.

Front-End Developer | DWC Consult (TOTVS)

Mar 2021 – May 2023

Brazil / Remote

- Developed responsive web interfaces using Angular, TypeScript, PO-UI, HTML5, and CSS3 for ERP-related applications.
- Integrated frontend applications with TOTVS environments and backend services, supporting accurate data flow and system stability.
- Improved UI workflows, navigation patterns, UX consistency, and component reuse to support faster user interaction across enterprise applications.
- Contributed to high-demand ERP modules used daily by medium and large organizations, focusing on reliability and maintainability.
- Applied frontend best practices, reusable components, clean code principles, and performance-focused development standards.

EDUCATION

Postgraduate Diploma in Software Engineering | Estacio University Center | 2023 – 2024

Bachelor's Degree in Civil Engineering | UNIP – Paulista University | 2017 – 2022
